

KODAK PROFESSIONAL Single-Use Chemistry Kit, Process E-6

TAKE PICTURES. FURTHER.™

Single-Use Chemistry Kit

For photographers
who do their own
E-6 film processing!

If you are a photographer who processes color reversal films in your own darkroom, you can now depend on high-quality performance from Kodak chemicals to get the job done right.

The KODAK PROFESSIONAL Single-Use Chemistry Kit, Process E-6, is specially designed for photographers who process small batches of color reversal films in rotary-tube processors, small tanks, or other single-use processes. Each kit makes 5 litres of first developer, reversal bath, color developer, pre-bleach, bleach, fixer, and final rinse to give you the reliable performance you expect from Kodak chemicals.

Kodak Professional

Single-Use Chemistry Kit

The KODAK PROFESSIONAL Single-Use Chemistry Kit, Process E-6, features the following:

- All the chemicals you'll need in a single kit
- Easy to prepare solutions
- Single use, all chemicals are expended together
- No storage of partially used concentrates
- More affordable price than buying separate components
- Good sensitometric and physical performance with KODAK PROFESSIONAL Color Reversal Films processed in E-6 chemicals
- And like Kodak's entire Process E-6 chemical family, no formaldehyde fumes

Single-Use Chemistry Kit components:

Process Step	Features
First Developer	<ul style="list-style-type: none"> • Improved formula • Less likely to precipitate during shipment and storage • More economical
